

# **Supporting Pupils at School with Medical Conditions Policy.**

**Date of Last Review:** February 2022

**Reviewed By:** Miss N Rock

**Agreed By:** Governors

**Frequency of Review:** Annually

**Date of Next Review:** February 2023

# Introduction

---

*This school is an inclusive community that welcomes and supports pupils with medical conditions so that they can play a full and active role in all aspects of school life, remain as healthy as possible and achieve their academic potential.*

*The Department for Education statutory guidance 'Supporting pupils with medical conditions at school' (2014) states:*

*"Children and young people with medical conditions are entitled to a full education and have the same rights of admission to school as other children. This means that no child with a medical condition can be denied admission or prevented from taking up a place in school because arrangements for their medical condition have not been made. However, in line with their safeguarding duties, governing bodies should ensure that pupils' health is not put at unnecessary risk from, for example, infectious diseases."*

*This policy takes into account the school's legal duties under the Children and Families Act 2014 to make arrangements to support pupils with medical conditions, as well as its duties under the Equality Act 2010. This policy details the school's arrangements to support pupils with long term medical conditions. In this document 'medical condition' refers to any physical or mental health condition that requires ongoing health professional input.*

*This policy will be reviewed in September 2022 or earlier if there is any change in the regulations. The effectiveness of these procedures will be monitored by the governing board.*

Identification, Registers and Individual Healthcare plans

## **1. Identification**

Parents/carers are asked if their child has any physical or mental health condition on the medical questionnaire as part of the admissions process and annually thereafter.

Year teams ensure that every child with a medical condition has an individual healthcare plan in place and every effort is made to ensure that arrangements are put in place within two weeks.

Parents/carers are responsible for informing the school of any new diagnosis, or changes to their child's medical condition, as soon as possible. It is the school's responsibility to act on this information.

## **2. Registers**

A register of pupils with medical conditions to identify and safeguard these students. This register is held in Inclusion and includes the child's individual healthcare plan. Basic information on medical conditions is held on SIMs to ensure all staff have access and as a result ensure safeguarding of students.

Pupils' confidentiality is protected in line with the General Data Protection Regulation (GDPR), and information is only shared with relevant members of staff and healthcare professionals as appropriate.

### **3. Individual healthcare plans**

---

Medical needs are specific to an individual pupil. As such, all pupils with a medical condition require an individual healthcare plan.

All pupils with a medical condition have a meeting to discuss the individual healthcare plan. For more severe/complex conditions, an additional meeting between relevant school staff (including those who will be providing support to the pupil) and the parent/carer will normally be required to complete the individual healthcare plan, and may also involve health professionals and the pupil if appropriate.

All individual healthcare plans will detail the medication and care requirements at school, what to do in an emergency and details of the child's GP. **For more severe and/or complex medical conditions, the individual healthcare plan will also include an individual risk assessment**

If a pupil has special educational needs or disabilities (SEND), these needs will be made clear in the individual healthcare plan and linked to their SEN or Education, Health and Care (EHC) plan if they have one.

Individual healthcare plans will be updated annually, or whenever the pupil's needs change.

A copy of the individual healthcare plan will be maintained and updated by the school and is easily accessible to staff who need to refer to it, while also preserving confidentiality in line with the General Data Protection Regulation.

#### **4. Administering medication at school**

Medication will only be administered at school when it would be detrimental to a child's health or school attendance not to do so. Where clinically possible, parents/carers should request their prescribing clinician to prescribe medication in dose frequencies which enable them to be taken outside the school day.

If medication is required at school, this will only be given as detailed in the pupil's individual health care plan, and when parents/carers fill out a medication consent form. *If there is a short-term need parents/carers should contact the school to discuss and the medication consent form must be completed by parents/carers.*

An accurate record is kept by the inclusion lead of all the medication administered, including the dose, time, date and supervising staff

#### **5. Support for staff who administer medication**

Where appropriate members of staff are trained to administer routine and emergency medication and undertake procedures to meet the care needs of an individual child.

All staff are aware of the specific members of staff trained to administer medication or medical procedures in an emergency situation.

The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the level of risk.

#### **6. Storing medication**

All medication is stored safely in the Hawthorne Room or where appropriate year team office. Pupils with medical conditions and staff know where they are at all times, and who holds the key to the storage facility.

*Pupils are allowed to carry their own medication/equipment if this is appropriate for their age and individual healthcare plan and has been risk assessed.* Parents/carers should check that this medication is in date.

The inclusion lead ensures that medication is in date and labelled in its original container where possible (although insulin will generally be supplied in an insulin injector or pump), and in accordance with its instructions including storage temperature.

Any controlled drugs (e.g. methylphenidate [Ritalin], some strong painkillers marked CD on container) stored securely, but accessibly, with only named staff having access.

Parents/carers must collect all medication/equipment annually, and to provide new and in-date medication at the start of the academic year. It is the parent/carer's responsibility to dispose of out-of-date medication.

#### **7. Emergency inhalers and adrenaline pens**

Pupils keep their own inhalers and adrenaline pens if appropriate. They are stored securely but accessibly if not either by the Inclusion lead or year team.

### **8. Staff training**

Different levels of training are required for different members of staff in order to meet the school's duties to support pupils with medical conditions. Training is provided in order to meet the requirements of individual health care plans. The school keeps a record of staff training. There are sufficient numbers of staff trained to support pupils with specific medical conditions, taking into account staff absences, staff turnover and other contingencies.

All staff, including temporary staff, are aware of this 'Supporting Pupils with Medical Conditions' policy and their role in implementing the policy as part of induction.

All staff know which named members of staff should be called on in the event of a medical emergency and are familiar with the procedure for calling the emergency services. All staff are aware that if a pupil is taken to hospital by ambulance, a member of staff must accompany them and remain with them until a parent or carer arrives. Pupils should not be taken to hospital in staff cars.

First aiders (*including paediatric first aiders as appropriate*) are trained in the management of common medical emergencies and Basic Life Support, including Cardiopulmonary Resuscitation (CPR). This is refreshed at least every three years.

The family of a child will be key in providing relevant information to school about how their child's needs can be met, and parents/ carers should be asked for their views. They may provide specific advice, but will not be the sole trainer.

## **9. Inclusion**

The school is committed to providing an accessible physical environment for pupils with medical conditions. This includes out-of-school activities.

All staff are aware of the potential social problems that pupils with medical conditions may experience and use this knowledge, alongside the school's bullying policy, to help prevent and deal with any issues.

Any measures to identify pupils with medical conditions for their safety should be proportionate and take into account confidentiality and emotional wellbeing.

The needs of pupils with medical conditions are adequately considered so that they can participate fully in all structured and unstructured activities, extended school activities and residential visits.

All pupils are entitled to take part in physical activity (including out-of-school clubs and team sports). All relevant staff will make reasonable adjustments to physical activity sessions in accordance with a pupil's individual healthcare plan. This may involve ensuring that pupils have the appropriate medication/equipment/food with them during physical activity.

A risk assessment is carried out before an educational visit following the Trips and Visits Policy. The needs of pupils with medical conditions are considered during this process and plans are put in place for any additional medication, equipment or support that may be required. This will require consultation with parent/carers and pupils and may require advice from the relevant healthcare professional to ensure that pupils can participate safely.

## **10. Impact on attendance and learning**

School staff understand that frequent absences, or symptoms, such as limited concentration and frequent tiredness, may be due to a pupil's medical condition.

Where a pupil has frequent absences or a prolonged absence due to a medical condition, it is expected that parents/ carers will work with the school and healthcare providers to ensure relevant information is available as part of a coordinated care/support approach.

The school will refer pupils with medical conditions who are finding it difficult to keep up educationally to a relevant member of staff (e.g. the Special Educational Needs Co-ordinator) who will liaise with the pupil (where appropriate) parent and the pupils' healthcare professional.

Where a child is returning to school following a period of hospital education or alternative provision (including home tuition), this school will work with the local authority and educational provider to ensure that the child receives the support they need to reintegrate effectively. This may include updating their individual healthcare plan where necessary.

**The school investigates all serious incidents related to this policy and reports these to the Schools Health and Safety Advisor. Learning from these incidents is shared with staff and used to inform any subsequent revisions to this policy.**

The school responds to all concerns and complaints related to implementation of this policy, in line with the school's complaints policy.

## **Covid 19 Update**

Students with health conditions fit into 3 categories:

- 1 – Health conditions which do not pose any extra risk from Covid 19.
- 2 – Health conditions classed as clinically vulnerable, meaning you are at higher risk of severe illness from coronavirus.
- 3 – Health conditions classed as clinically extremely vulnerable that, based on what we know about the virus so far, place someone at greatest risk of severe illness from COVID-19. Anyone in this category will have received a letter informing them of this.

The school follows the most recent DFE/PHE guidance on whether students in each category are expected to attend school in person or learn at home (shield).

Lateral Flow Testing will be carried out for children attending school, subject to parental consent at point of return to school following the most recent DFE/PHE guidance. If there is a positive result following an LRT then the person will be sent home to self-isolate.

---

## ***Glossary***

**Controlled Drug (CD):** Medication that is controlled as part of the misuse of drugs legislation (e.g. methylphenidate/Ritalin or some strong pain killers)

**Education, Health and Care (EHC) plans:** A legal document that describes a child's special educational, health and social care needs, and support required to meet those needs

**General Data Protection Regulation (GDPR):** A data protection regulation from May 2018 intended to strengthen and unify data protection for individuals.

**Individual Healthcare plans:** A document that describes a child's medical needs and support required in school to meet those needs.

**Individual risk assessment:** A risk assessment to determine the risks and controls required for pupils with severe/complex or potentially life-threatening health conditions.

**Medical condition:** For the purposes of this policy, 'medical condition' refers to any physical or mental health conditions that required ongoing health professional input (e.g. from GP, clinic or hospital specialist).

**Medical Conditions Co-ordinators/leaders:** Designated members of staff who lead the implementation of the 'Supporting Pupils at School with Medical Conditions' policy and support pupils with medical conditions.

**Special educational needs or disabilities (SEND):** Special educational needs and disabilities that can affect a child or young person's ability to learn.

Special Educational Needs Co-ordinator (SENDCO): Designated members of staff who lead the implementation of the SEND policy and support pupils with SEND.

---

**Appendix 1: ‘Supporting Pupils at School with Medical Conditions’ checklist**

Area	In place	Needs some work	Not in place	Named person responsible for
<b>Policy and implementation:</b>				
Agreed policy in place				
Policy revised annually in consultation with governors and staff				
Policy on the school website				
Governing board committee with a responsibility for and link governor(s) who visits the school termly to monitor implementation				
Annual report from the headteacher to the governing board on this policy				
Annual report to parents/communication via newsletters				
<b>Identification, registers and individual healthcare plans:</b>				
Process in place for notifying the school of pupils with medical conditions (e.g. questionnaire)				
Process in place for ensuring all pupils with medical conditions have an individual healthcare plan in place before they start school				
Process in place for reviewing the individual healthcare plans every year				

A register of pupils with medical conditions in a secure location, with individual healthcare plans, medication consent forms, medication records, and individual risk assessment forms				
<b>Medication:</b>				
Stores medication securely but accessibly				

Process for ensuring all medication and equipment (including defibrillators) are in date				
Accurate record of medication administered				
Protocol for use of emergency inhalers and adrenaline autoinjectors ( <i>if applicable</i> )				
<b>Staff/training:</b>				
Policy is part of all staff induction, including temporary, supply staff and volunteers				
<b>Staff/training:</b>				
All staff are aware of the emergency procedures (Inc. information displays)				
Information on this policy in the staff handbook				
All staff know the pupils they work with who have an individual healthcare plan/medical conditions				
School has risk assessed and has a sufficient number of trained first aiders				
Insurance cover current and adequate to needs				

Medical conditions co-ordinators/leads are clearly known by all staff, pupils, parents and other stakeholders				
Medical conditions co-ordinators/leads are clear about line management arrangements, annual appraisals and attend regular training				
Job descriptions exist for medical conditions co-ordinators/leads and includes relevant responsibilities				
<b>Whole school environment:</b>				
School admission arrangements take this policy into consideration				
Risk assessments for educational visits are in place				
Process for reporting incidents to Ealing Council Health and Safety				

**Appendix 2: Medical questionnaire (for the school enrolment form and annually thereafter)**

Name of Pupil	
Date of Birth	
Year Group / Class	
Name of GP	
Address of GP	

1. Is your child currently under the care of the GP/clinic/hospital for a medical condition\* (physical or mental health)?

**Yes / No**

If yes, please give details:

2. Is there any other condition/health concern you need to make us aware of?

**Yes / No**

If yes, please give details:

3. Does your child require medication to be taken during school hours? **Yes**

**/ No**

If yes, please give details:

If you have ticked 'yes' above, a member of staff will contact you to discuss your child's medical needs further. All pupils with medical conditions\* will require an individual healthcare plan before the start of the school year. If the medical condition is serious, complex and/or life threatening the school will organise a meeting to discuss the individual healthcare plan. If medication needs to be taken at school, all parents/carers will need to complete the medication form (Appendix 6 of the 'Supporting Pupils with Medical Conditions' Policy).

4. I give **consent** to share this information with relevant school staff and health professionals including the school nursing service. **Yes / No**

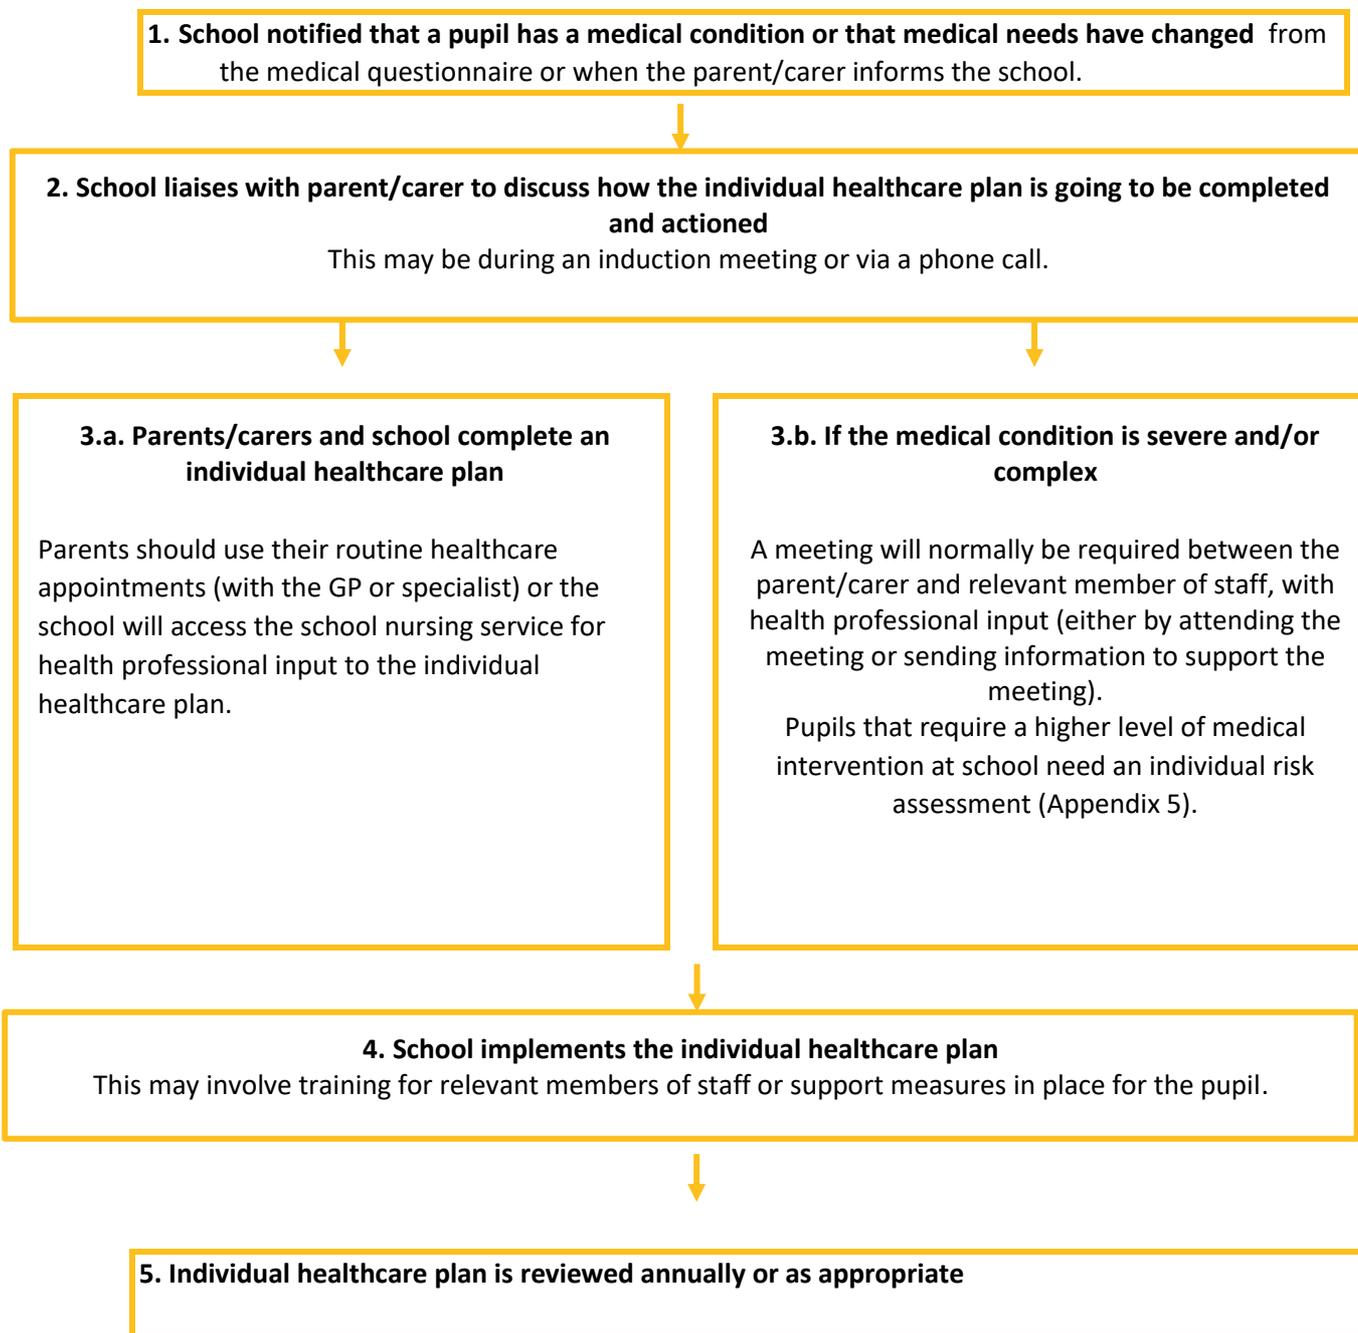

Name of Parent / Carer

Signature of Parent / Carer	
Date	

*\* The school takes 'medical condition' to refer to any physical or mental health condition that requires ongoing health professional input.*

**Appendix**

**3: Procedure following notification that a pupil has a medical condition (flow chart).**

**4: Individual pupil risk assessment form**

Hazard	Risk			Existing control measures	Recommendations/further actions required
	Likelihood of occurrence	Severity of harm	Overall risk		

**Appendix**

Expiry date	
How much to give (i.e. dose to be given)?	
When to be given	
Any other instructions	
Number of tablets/quantity to be given to school/setting	

**Note: Medicines must be in the original container as dispensed by the pharmacy**

Daytime phone no. of parent/carer	
Name of GP, GP practice name and phone number	
Agreed review date to be initiated by	

The above information is, to the best of my knowledge, accurate at the time of writing and I give consent to school staff administering medicine in accordance with the school's policy. I will inform the school immediately, in writing, if there is any change in dosage or frequency of the medicine or if the medicine is stopped.

## Appendix 7: Emergency Inhalers and Adrenaline Auto-Injectors (AAIs)

This section needs to be read in conjunction with the following Department of Health guidance:

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/416468/emergency\\_inhalers\\_in\\_schools.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/416468/emergency_inhalers_in_schools.pdf)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/645476/Adrenaline\\_auto\\_injectors\\_in\\_schools.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/645476/Adrenaline_auto_injectors_in_schools.pdf)

Schools are not required to hold an inhaler or AAIs – this is a discretionary power enabling schools to do this if they wish. However, keeping an inhaler and/or AAIs for use in an emergency prevents unnecessary and traumatic trips to hospital for a child and potentially saves their life. Schools that choose to hold an emergency inhaler and/or AAIs need protocols for their use to protect staff by ensuring they know what to do in the event of a child having an asthma or anaphylactic attack.

The protocol should include:

- Arrangements for the supply, storage, care, and disposal of the inhaler, spacers and AAI devices, in line with this ‘Supporting Pupils with Medical Conditions’ policy □ Having a register of children in the school who have been:
  - Diagnosed with asthma or prescribed a reliever inhaler. A copy of the register should be kept with the emergency inhaler
  - Prescribed AAIs (or where a doctor has provided a written plan recommending AAI(s) to be used in the event of anaphylaxis).
- Having written parental consent for use of the emergency inhaler and/or for use of the spare AAI(s), included as part of a child’s individual healthcare plan. This should be signed in the school asthma card or the allergy action plan (Appendix 4).
- Ensuring that the emergency inhaler and spare AAIs are only used by children with written parental consent for their use
- Appropriate support and training for staff is provided in the use of the emergency inhaler and spare AAIs in line with this ‘Supporting Pupils with Medical Conditions’ policy
- Keeping a record of use of the emergency inhaler and/or AAIs as required by this ‘Supporting Pupils with Medical Conditions’ policy (Appendix 7) and informing the parent/carer when their child has been administered an inhaler/AAI and whether this was the school’s spare inhaler/AAI or the pupil’s own device (Appendix 9). This should include where and when the attack took place, how much medication was given and by whom.
- Having at least two volunteers responsible for ensuring the protocol is followed

Schools can purchase small quantities of inhalers, spacers and AAIs from a community pharmacy. The pharmacy will need a request signed by the principal or head teacher on headed paper stating:

- The name of the school for which the product is required;
- The purpose for which that product is required, and
- The total quantity required

## ASTHMA

From 1st October 2014 the Human Medicines (Amendment) (No. 2) Regulations 2014 allows schools to buy salbutamol inhalers, without a prescription, for use in emergencies.

**The emergency salbutamol inhaler should only be used by children, for whom written parental consent for use of the emergency inhaler has been given, who have either been diagnosed with asthma and prescribed an inhaler, or who have been prescribed an inhaler as reliever medication.**

An Emergency asthma inhaler kit should include:

- A salbutamol metered dose inhaler;
- At least two plastic spacers compatible with the inhaler;
- Instructions on using the inhaler and spacer;
- Instructions on cleaning and storing the inhaler;
- Manufacturer's information;
- A checklist of inhalers, identified by their batch number and expiry date, with monthly checks recorded;
- A note of the arrangements for replacing the inhaler and spacers;
- A list of children permitted to use the emergency inhaler as detailed in their individual healthcare plans;
- A record of administration (i.e. when the inhaler has been used). This should include where and when the attack took place how much medication was given and by whom.

Schools can consider keeping more than 1 kit if they cover more than 1 site.

It is recommended that at least 2 volunteers from school staff should have responsibility for ensuring that:

- On a monthly basis, the inhaler and spacers are present and in working order, and the inhaler has sufficient number of doses available;
- Replacement inhalers are obtained when expiry dates approach;
- Replacement spacers are available following use;
- The plastic inhaler housing (which holds the canister) has been cleaned, dried and returned so that replacements are available if necessary.

The kit must be kept in a safe place but must not be locked away. It should be kept separate from any children's inhalers and the inhaler(s) labelled to avoid confusion with a child's inhaler.

The plastic spacer should not be reused and can be given to the child to use at home. The inhaler can be reused provided it is cleaned after use.

A child may be prescribed an inhaler for their asthma which contains an alternative reliever medication to salbutamol (such as terbutaline). The salbutamol inhaler should still be used by these children if their own inhaler is not accessible – it will still help to relieve their asthma and could save their life.

*See also: Healthy London Partnership pharmacy guidance: <https://www.healthy london.org/wp-content/uploads/2017/10/Pharmacy-guidance-for-supply-ofsalbutamol-to-schools.docx>*

## **ANAPHYLAXIS**

From 1 October 2017, the Human Medicines (Amendment) Regulations 2017 allows schools to obtain adrenaline auto-injector (AAI) devices without a prescription, for emergency use in children who are at risk of anaphylaxis but their own device is not available or not working (e.g. because it is broken, or out-of-date).

**Schools may administer their “spare” adrenaline auto-injector (AAI), obtained for use in emergencies, if available, but only to a pupil at risk of anaphylaxis, where both medical authorisation and written parental consent for use of the spare AAI has been provided. The school’s spare AAI can be administered to a pupil whose own prescribed AAI cannot be administered correctly without delay.**

**In severe cases the allergic reaction can progress within minutes into a life-threatening reaction. Severe reactions can require much more than an adrenaline injection and it is therefore vital to contact Emergency Services as early as possible.**

**In the event of a possible severe allergic reaction in a pupil who does not meet these criteria, emergency services (999) should be contacted and advice sought from them as to whether administration of the spare emergency AAI is appropriate.**

**SEVERE ANAPHYLAXIS IS AN EXTREMELY TIME-CRITICAL SITUATION: DELAYS IN ADMINISTERING ADRENALINE HAVE BEEN ASSOCIATED WITH FATAL OUTCOMES.**

Depending on their level of understanding and competence, **children and particularly teenagers should carry their AAI(s) on their person at all times or they should be quickly and easily accessible at all times.** If the AAI(s) are not carried by the pupil, then they should be kept in a central place in a box marked clearly with the pupil’s name but NOT locked in a cupboard or an office where access is restricted.

AAIs are available in different doses depending on the manufacturer. Schools should hold a single brand to avoid confusion in training and administration. ‘EpiPen’ is the most well-known and likely to be the brand used by most pupils.

It is good practice for schools holding spare AAIs to store these as part of an emergency anaphylaxis kit which should include:

- 1 or more AAI(s)
- Instructions on how to use the device(s)
- Instructions on storage of the AAI device(s)
- Manufacturer’s information
- A checklist of injectors, identified by their batch number and expiry date with monthly checks recorded
- A note of the arrangements for replacing the injectors □ A list of pupils to whom the AAI can be administered □ An administration record.

The kit must be kept in a safe place but must not be locked away. It should be kept separate from any children’s AAIs and the labelled to avoid confusion. The kit should be located not more than 5 minutes away from where it might be needed.

AAIs can be used through clothes and should be injected into the upper outer thigh in line with the instructions provided by the manufacturer. If someone appears to be having a severe allergic reaction (anaphylaxis), emergency services (999) MUST be called without delay, even if they have already used their own AAI device, or a spare AAI.

- When dialling 999, give clear and precise directions to the emergency operator, including the location’s postcode.

- If the pupil's condition deteriorates and a second dose adrenaline is administered after making the initial 999 call, make a second call to the emergency services to confirm that an ambulance has been dispatched.
- Send someone outside to direct the ambulance paramedics when they arrive.
- Tell the paramedics:
  - If the child is known to have an allergy
  - What might have caused this reaction e.g. recent food;
  - The time the AAI was given.

**Appendix 8: Letters to inform parents/carers of their child's use of the school's emergency inhaler\***

School name:.....

Child's name:.....

Child's class:.....

Date:.....

Dear.....

This letter is to formally inform you that.....has had problems breathing today.

This happened when.....

They did not have their own inhaler with them so a member of staff helped them to use the emergency asthma inhaler containing salbutamol. They were given ....puffs.

Although they soon felt better, we would strongly advise you that your child is seen by their own doctor as soon as possible.

Please provide a new unopened replacement spacer as soon as possible.

Please can you ensure that your child brings in a working in-date inhaler and spacer for use in school. Both should be clearly labelled with your child's name and date of birth.

Yours sincerely

*\*Please note that parents will be informed immediately when a child has used the school's emergency adrenaline autoinjector (and emergency services called).*

## Appendix 9: Training resources for school staff

### Online

#### **Anaphylaxis Campaign AllergyWise Online Course**

Free online anaphylaxis training course AllergyWise for Schools is designed to ensure that key staff in schools are fully aware of the signs and symptoms of anaphylaxis, how to provide emergency treatment and the implications for management of severely allergic children from Key Stages 1 to 5 in an education setting.

<https://allergywise.org.uk/course-login/>

#### **Supporting Children's Health Asthma Online Course**

Being aware of asthma and its triggers can help to ensure children with asthma in your care are safe and can get involved in the same activities as any other child without issue or harm. This module aims to help you support children who have asthma by:

- Raising your awareness of the condition and how it's managed
- Exploring plans, you may need to ensure that children with asthma in your care are supported

<https://www.supportingchildrenshealth.org/asthma-module/>

## Appendix 10: Checklist: responsibilities of parents/carers

- ✓ Informing the school if your child has a 'medical condition' (as defined in the 'Supporting Pupils with Medical Conditions' policy) and providing consent to share this information with relevant healthcare professionals including the school nursing service.
- ✓ Liaising with the school to complete an individual healthcare plan, ideally before the start of the school year. The individual healthcare plan requires health professional input, either by the school nursing service (arranged by the school), or by appointment with your health professional (GP, practice nurse or specialist).
- ✓ Completing a medicines permission letter if your child requires medication during school hours.
- ✓ Completing an individual pupil risk assessment form during a meeting with school staff if your child's needs are severe, complex or potentially life threatening.
- ✓ Informing the school of any medicines the child requires during visits, field trips and other out-of-school activities.
- ✓ Ensuring your child's medicines and medical devices are labeled with their full name and date of birth, in the original pharmacy packaging.
- ✓ Ensuring that your child's medicines are within their expiry dates.

- ✓ Ensuring that new and in date medicines come into school on the first day of the new academic year, to collect all medication back at the end of the school year, and to dispose of any out-of-date medication.
- ✓ Ensuring that your child catches up with any school work they have missed if they are off school due to their medical condition or healthcare appointments.
- ✓ Providing the school with supporting information from your healthcare professional if your child has frequent or prolonged absence(s) from school.
- ✓ Informing the school of any changes to your child's condition
- ✓ Liaising with the school annually to ensure that the individual healthcare plan is up to date (even if just to say 'no changes').
